# PLASCON MARINE HIGH OPACITY UNIVERSAL UNDERCOAT

## PRODUCT DESCRIPTION AND USES
Plascon Marine High Opacity Universal Undercoat is an alkyd based product specially formulated to provide a flexible, non absorbent base for Plascon Super Marine Enamel gloss and other marine gloss finishes. It has excellent hiding power and will fill minor cracks and other blemishes. It is suitable for interior and exterior use and can be applied on wood, metal, plaster, stone etc. It should be applied over an appropriate primer. It offers excellent inter-coat adhesion between primer and top coat.

## SURFACE PREPARATION

### New Primed Metal, Wood or Plaster etc.
Ensure surface is clean and dry. Apply 1 coat of Plascon Marine High Opacity Universal Undercoat over the appropriate primer. Allow 16 hours drying before overcoating.

### Previously painted - Unsound surfaces
Remove any loose or flaky materials. Ensure surface is clean, dry and free of other defects. Apply the appropriate patch primer to affected areas. Then slightly abrade the surface to give enhanced adhesion. Apply 1 coat Plascon Marine High Opacity Universal Undercoat.

### Previously painted - Sound surfaces
Lightly abrade. Ensure the surface is clean and apply 1 coat of Plascon Marine High Opacity Universal Undercoat.

## FINISH
Matt

## APPLICATION
Apply by brush, roller or spray.

## THINNING AND MIXING
With Plascon White Spirit. Stir well before use.

## EQUIPMENT CLEANING
Clean the equipment immediately after use with Plascon White Spirit.

## DRYING TIME
Overcoat after 16 hours.
