PLASCON STONE WALL LACQUER

PRODUCT DESCRIPTION:

Plascon Stone Wall Lacquer is a Styrene acrylic based clear lacquer specially formulated for application to Stone, brick and concrete surfaces, to give a silky protective surface.

SURFACE PREPARATION

Clean the stone work well with stiff fibre or nylon brush to remove all loose materials. Ensure the Surface is completely dry.

APPLICATION: Apply by brush

THINNING AND MIXING: Thin with water. Mix one part Stone Wall Lacquer to two parts water. On smooth surfaces thin the product 1:1 with water before use.

FINISH: Low sheen

EQUIPMENT CLEANING: Use water for cleaning

DRYING TIME: Dries in one hour. Re-coatable in 4 hours.

COLOUR RANGE: Milky when wet but transparent when dry.

SPREADING CAPACITY: Depending on surface porosity and texture Approx. 10-12m² per litre on smooth plaster. Coverage will greatly be reduced when applied on porous or textured surfaces.

PACK SIZE: 1 litre, 4 litres, 20 litres

NB. Stone Wall Lacquer should not be used on floor surfaces.
