Plascon Gypsum Board Primer is a P.V.A. copolymer based primer. It is used as a Sealer/Binder on Gypsum board surfaces, Gypsum plaster to improve adhesion of the paint to the substrate.

**SURFACE PREPARATION**
Prepare the surface by scraping and brushing with stiff fibre or nylon brush to remove all loose material. Ensure the surface is completely dry.

**APPLICATION**
By brush.

**THINNING AND MIXING**
Ready for use with supply viscosity

**EQUIPMENT CLEANING**
Use water for cleaning.

**DRYING TIME**
Dries in one hour. Recoatable is minimum 4 hours.

**COLOUR RANGE**
Off white when dry.

**SPREADING CAPACITY**
Depending on surface porosity and texture Approx. 10-12m² per litre on smooth surface. Coverage will greatly be reduced when applied on porous or textured surfaces.

**PACK SIZES**
1 Litre, 4 Litre, 20 Litre
