Plascon Stucco Putty Exterior is a quick drying putty with anti-fungal property and is recommended for both interior and exterior.

- High Solids,
- Excellent filling,
- Easy to apply,
- No sinking/cracking.

Not to be applied too thick when filling cracks and areas with heavy undulation build up to the required thickness by applying it in layers. To be applied on a coat of Plascon Acrylic Sealer Undercoat or previously painted surfaces. After sanding a coat of Plascon Acrylic Sealer Undercoat to be applied before applying the topcoat.

Can be used indoors and outdoors for filling of minor dents and other irregularities on substrates such as plaster, concrete building boards, plywood etc. Can be used directly on a properly primed new surface or previously painted surfaces after necessary surface preparation. Stir content thoroughly before use.

 финиш расплывчатый.
