## PLASCON TEXTURED STUCCO COARSE

### PRODUCT DESCRIPTION
This is a superior grade stucco putty suited for both exterior and interior surfaces. It is geared to fill up larger dents on various surfaces like concrete, cement plaster and wooden surfaces. It has an excellent adhesion on the above certified surfaces including metal (ferrous) and can offer numerous texture forms on different modes of texture application. This is possible as it is chemically engineered to suit such characteristics. The formulation incorporates a versatile fungicide and algaecide to combat mould and algae growth both in the can and dry film.

### SURFACE PREPARATION
#### New Walls
Any loose material, grease or dirt must be completely removed before applying Plascon Textured Stucco Coarse.
On previously painted surfaces any deteriorated coats of old paint should be removed completely by scraping and wire brushing and any large cracks should be filled with a hard filler or cement and allowed to dry prior to applying Plascon Textured Stucco Coarse. Plascon Textured Stucco Coarse imparts a self-filling effect on minor cracks.

### FINISH
Matt, high build, textured.

### THINNING AND MIXING
Ready for use. Can be thinned depending on the mode of texture application

### APPLICATION
To be applied with a masonry trowel giving the desired texture.

### EQUIPMENT CLEANING
Clean the masonry trowel with water immediately after use.

### DRYING TIME
3 Hours.

### OPEN TIME
45 minutes.

### COLOUR RANGE
Available in White, Pastel and Deep shades.

### DENSITY
1.6-1.8

### %SOLID (By Weight)
70-82

### SPREADING CAPACITY
0.39 – 0.55M² per Kg

### PACK SIZE
5 Kilos and 25 Kilos.
