PLASCON PAINT REMOVER XTREME

PRODUCT DESCRIPTION AND USES
Plascon Paint Remover Xtreme is an all-purpose paint remover for all types of paints - Two Pack Epoxies, Acrylics, Cellulose Lacquers, synthetic air drying, baking enamels etc.

APPLICATION
Plascon Paint Remover Xtreme can be used for removal of coatings on metal and concrete.

DIRECTIONS FOR USE
Apply a generous coat of Paint Remover Xtreme onto the painted surfaces. Allow time for the remover to penetrate and blister the coating. The time taken will vary with type and thickness of the coating. Normally 5 to 10 minutes will suffice, but for stoving and reaction curing paints an interval of up to 30 minutes may be required. Apply a second coat if required.

Remove softened paint with a glazing knife then wash the surface thoroughly with water. Rinse with solvent or cleaning thinner to remove wax and grease.

PACK SIZE
1 litre & 5 litres

NOTE:
1. Use Gloves and goggles and nose masks during application. In case of contact with skin or clothing, the affected areas should be washed with water immediately.
2. Do not use Paint Remover Xtreme in confined spaces. It is necessary to arrange good ventilation because Paint Remover Xtreme vapours are strong and narcotic.
3. Paint Remover Xtreme may develop pressure in the container. Extra care must be taken when opening the can. Point the container away from the face when opening.
4. Avoid skin contact. Do not smoke as vapours will be converted to harmful substance.

HAZARD SYMBOLS
Highly Flammable, Toxic, Harmful to Environment
