**PRODUCT DESCRIPTION AND USES**

Plascon Alkali Resistant Primer/Sealer is based on cyclised rubber and designed for use on new and bare alkaline surfaces e.g. plaster, cement, concrete, hard asbestos sheets etc., prior to the application of oil-based paints. It seals new plaster before the application of an undercoat or finishing coat. Should not be used for under bound or flaking surfaces.

It protects the coat of subsequent paint from saponification and discoloration.

**SURFACE PREPARATION**

New and unpainted plaster, cement, stone, brick etc. Ensure the surface is clean and dry. Apply one coat of Alkali Resistant Primer Sealer. Allow to dry thoroughly for 24 hours.

**FINISH**

Matt

**APPLICATION**

By brush

**THINNING AND MIXING**

White spirit for brushing

**EQUIPMENT CLEANING**

Clean the equipment immediately after use with Plascon White Spirit.

**DRYING TIMES**

Recoatable after 16 hours.

**COLOUR RANGE**

Off White

**SPREADING CAPACITY**

Approximately 10-12 Square meters per litre on smooth, steel float plaster. The spreading capacity will be considerably reduced when applied to rough or porous surfaces.

**PACK SIZES**

1 Litre, 4 Litre and 20 Litres
