**PLASCON BITUMINOUS ALUMINIUM PAINT**

**PRODUCT DESCRIPTION AND USES:** An exterior protective coating that can be applied to metal, wood and concrete surfaces. Ideal for use on metal pipes, tanks, structural steelwork, corrugated and flat galvanized roof sheets, bitumen based roofing felt etc. Surfaces previously painted with bitumen-based paints can be over-coated with Plascon Bituminous Aluminium Paint to produce a metallic reflective finish.

**CHARACTERISTICS:** Manufactured from a high grade bitumen and leafing aluminium pigment, incorporated in a synthetic resin.

**ADVANTAGES:** Durable and extremely flexible. It has reasonable chemical resistance to mild chemical fumes or spillage. Good adhesion to most surfaces. Application on storage tanks will reduce evaporation losses. It is easy to apply. The incorporation of the aluminium pigment improves the UV radiation resistance of the bitumen.

**FINISH:** Metallic lustre.

**APPLICATION:** By brush or spray.

**THINNING AND MIXING** Supplied ready for use by brush application. Thin with Plascon White Spirit for spray application. Stir well before use.

**DRYING TIME:** Surface dry in 3-4 hours but will remain fairly soft for a few days. Recoatable in 16 hours.

**SPREADING CAPACITY:** 11-14 square metres per litre when applied by brush on smooth surfaces.

**EQUIPMENT CLEANER:** White Spirit.

**COLOUR RANGE:** Metallic Grey.

**PACK SIZES** 1 Litre, 4 Litres, 20 Litres
