PLASCON UPOX FLOOR PAINT

PRODUCT DESCRIPTION AND USES

Plascon Upox Floor Paint is a two component Epoxy based enamel, with excellent adhesion to all types of flooring material-concrete, plaster, stone, brick, wooden, metal etc. Plascon Upox Floor Paint has excellent resistance to chemicals, abrasions, including heavy traffic and detergent washing. It is ideal for factory floor finishing where chemicals, heavy traffic flow and washing are prevalent.

SURFACE PREPARATION

For use on wood and concrete, surfaces must be thoroughly dry and sanded, smooth, free of old paint, dirt and grease.

Priming

For wood and concrete, stone, brick the first coat should be thinned with about 20% Plascon Upox Thinner.

For metal, a coat of Plascon Upox Primer mixed with Hardener should be applied.

APPLICATION

By brush or spray. Mix Plascon Upox Floor Paint with Upox Hardener in the ratio of 3 parts paint to 1 part Hardener by volume.

Apply 2-3 coats allowing 24 hours drying time between each coat.

FINISH

Gloss

THINNING AND MIXING
